

CLAIMS

I claim:

1. A hair treatment device comprising:
a hair roller including a compressible roller body, a first notch
and a second notch;
a base implement including a first end and a second end
wherein both said first and second ends each include a cradle for
receiving said notches; and,
a support rod connecting said first end and said second end.
2. The hair roller of Claim 1, wherein said roller body is made of
a lightweight, heat insulating material.
3. The hair roller of Claim 1, wherein the inside of said roller
body contains a supporting structure.
4. The base implement of Claim 1, wherein said first end and said
second end each include a cut-out shoulder.
5. The base implement of Claim 1, wherein said support rod
includes a support arm.

6. A base implement comprising:
a first end and a second end, wherein both said first and second
ends each include a cradle; and,
a support rod connecting said first end and said second end.

5

7. The base implement of Claim 6, wherein said first end and said
second end each include a cut-out shoulder.

8. The base implement of Claim 6, wherein said support rod
includes a support arm.

10

9. A method of changing the appearance of one's hair comprising:
wrapping a tress of hair around a compressible roller body of a
hair roller, wherein said hair roller includes a first notch and a second
notch;

15

resting a base implement on a wearer's scalp, wherein said base
implement includes a first end and a second end wherein both first
and second ends each include a first and second cradle, respectively;

20

engaging said hair roller and said base implement by inserting
said first and second notch into said first and second cradle,
respectively;

applying solutions to the hair; and,
removing said tress of hair from said hair roller.

25

10. The method of Claim 9 wherein heat is applied to said tress of
hair.

11. The method of Claim 10 wherein said solutions are removed from said hair.
